

# CALL FOR PAPERS

STM (Security and Trust Management) is a recently established working group of ERCIM (European Research Consortium in Informatics and Mathematics). STM 2006 is the second workshop in this series, and has the following aims:

- to investigate the foundations and applications of security and trust in ICT
- to study the deep interplay between trust management and common security issues such as confidentiality, integrity and availability
- to identify and promote new areas of research connected with security management, e.g. dynamic and mobile coalition management (e.g., P2P, MANETs, Web/GRID services)
- to identify and promote new areas of research connected with trust management, e.g. reputation, recommendation, collaboration etc
- to provide a platform for presenting and discussing emerging ideas and trends

Topics of interest include but are not limited to:

- semantics and computational models for security and trust
- security and trust management architectures, mechanisms and policies
- networked systems security
- privacy and anonymity
- Identity management
- ICT for securing digital as well as physical assets
- cryptography

The primary focus is on high-quality original unpublished research, case studies, and implementation experiences. We encourage submissions discussing the application and deployment of security technologies in practice.

**Paper submissions** Submitted papers must not substantially overlap papers that have been published or that are simultaneously submitted to a journal or a conference with proceedings. Papers must have authors' affiliation and contact information on the first page. Papers are limited to 12 pages in ENTCS style format (using the generic template). Excessively long papers will be returned without review. Accepted papers will be published in a post-workshop ENTCS volume. To submit a paper, please visit <http://www.easychair.org/STM06/>. For more information contact [stm06@dti.unimi.it](mailto:stm06@dti.unimi.it). Papers must be received by the deadline of **June 4, 2006**.
